DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method of measuring the propagation time of an ultrasound signal between two spaced-apart transducers, classified in class 702, subclass 178.
 - II. Claims 10-13, drawn to an apparatus for measuring the propagation time of an ultrasound signal, classified in class 702, subclass 176.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case invention I has separate utility such as the method of measuring the propagation time of an ultrasound signal between two spaced-apart transducers of group I does not required comparator means connected to a receiver transducer to compare the amplitude of the receive signal with a trigger threshold voltage and to generate a signal representative of oscillations of said receive signal and means for measuring a fixed time connected to means for forming an excitation signal in order to measure a fixed time from the instant at which the emitter transducer is excited of group II and the apparatus for measuring the propagation time of an ultrasound signal of group II does not required steps of stopping measurement of the intermediate

propagation time when an i_{th} oscillation is detected; and determining the propagation time of the signal by taking the difference $T_{int} - i \times T_e$ of group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. A telephone call was made to Attorney Leonard W. Pojunas on 03/15/2004 to request an oral election to the above restriction requirement, but no reply has been received.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
